ENGINEERING MANPOWER COMMISSION

of the

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

April, 1981

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

The American Association of Engineering Societies (AAES) is a national organization with 38 member organizations representing nearly one million engineers.

As a central coordinating organization, AAES focuses the resources of the engineering societies on technological issues of national and international importance.

1981
OFFICERS

H. Arthur Nedom Chairman	Irvan F. Mendenhall Chairman-Elect
Nicholas J. Radell Secretary/Treasurer	Kenneth A. Roe Past-Chairman
Robert A. Frosch President	Carl Frey Executive Director

ENGINEERING AFFAIRS COUNCIL

The Engineering Affairs Council is responsible for matters concerned with the practice of engineering in the public interest. The Council encourages voluntary exchanges of information, coordination of goals and joint action.

1981
OFFICERS

Bruno O. Weinschel Chairman	James F. Shivler, Jr. Vice-Chairman
Eric Herz Secretary/Treasurer	

THE ENGINEERING MANPOWER COMMISSION
# of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

The Engineering Manpower Commission was organized in 1950 to serve as a focus for national technological manpower problems.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

"To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs, and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Engineering Affairs Council of AAES."

1981
EMC OFFICERS AND STAFF

Richard C. Fremon	Chairman
Kenneth C. Brooker	Vice-Chairman
Luke H. Noggle	Chairman, Surveys Committee
Francis W. Stacey	Chairman, Enrollment Survey
Patrick J. Sheridan	Manager, Manpower Activities
Barbara Ann Howley	Assistant
Judith Mellman	Assistant
Rosanna Bonadonna	Secretary

ACKNOWLEDGEMENTS

The Engineering Manpower Commission is pleased to recognize the invaluable assistance of A. Earl Renner and associates of E. I. duPont de Nemours and Co. for processing the data for this survey. We appreciate the cooperation of the hundreds of deans and college officials who provided the data on which this report is based. This survey was conducted under the direction of Dr. Francis W. Stacey, Chairman of the Enrollment Survey and coordinated by Barbara Ann Howley, Manpower Assistant to the Manager, Manpower Activities. Donald E. Irwin is consultant to the Engineering Manpower Commission staff.

INTRODUCTION

Since 1967, the Engineering Manpower Commission has conducted annual studies of engineering and technology enrollments in order to provide timely and accurate educational data. This publication is the thirteenth in that series and reflects enrollments as of fall, 1980.

This report is divided into two parts and presents data for all students enrolled in engineering and technology (which includes engineering technology and industrial technology) programs by curricula and school. Summaries of student enrollment in ABET-accredited programs are shown. Undergraduate students are reported by class and graduate students by degree level. Data is presented for all students combined as well as for Women, Black, Hispanic, American Indian, Asian/Pacific and Foreign National students. It should be noted that Part I deals exclusively with engineering enrollments and Part II with technology enrollments.

Part I contains detailed engineering enrollment data by school for all students, Black, Hispanic, American Indian, Asian/Pacific and Foreign National students as well as detailed data by curriculum for all students combined.

It also contains detailed data by curriculum for Women, Black, Hispanic, American Indian, Asian/Pacific and Foreign National students as well as summary curriculum data, combined for all schools, for each of the above groups of students.

Part II contains detailed technology enrollment data by school for all students, Black, Hispanic, American Indian, and Asian/Pacific students as well as detailed data by curriculum for all students combined.

It also contains detailed data by curriculum for Women, Black, Hispanic, American Indian and Asian/Pacific students as well as summary curriculum data, combined for all schools, for each of the above groups of students.

Although every attempt has been made to eliminate errors in reporting the statistics, some discrepancies may have crept into the tabulations. In several cases, inconsistencies in the data submitted have been corrected, or related curricula grouped under a common title so that this report would be manageable in size. Any questions regarding the course content of specific programs should be directed to the reporting institutions. Users of this report are advised to read the explanatory material before using the data tables provided herein.

THE 1980 ENGINEERING ENROLLMENT SURVEY

In September, 1980, questionnaires were sent to 287 U.S. schools offering engineering programs at the baccalaureate or higher degree level.

ESTIMATED DATA

Information was not received from the following engineering schools at the time of publication. In order to preserve continuity of past summary data, information from previous years' has been substituted for these institutions:

San Francisco State University
Tennessee State University-Nashville

In a few cases, schools estimated their minority data. In those cases, estimates are indicated by an asterisk (*) in the minority column.

In instances where schools submitted reports which were only partially complete in that the figures were not fully broken down by year, full or part-time status, degree level or minority allocation, judgment was used to distribute the data as necessary to suit the computer program format.

For purposes of recording accreditation status, information was obtained from the Accreditation Board for Engineering & Technology (ABET) 1979 report.

ABET-accreditation status for Bachelor's and Master's degree programs is shown in the column designated ACCR.

DATA TABLES

The following data tables are presented for students enrolled in engineering programs:

(1) Enrollments for all curricula combined for each school arranged by class and degree level for undergraduate and graduate students. Detailed data for all students combined, Women, Black, Hispanic, American Indian, Asian/Pacific and Foreign National students are reported in Part I.

(2) Enrollments for each curriculum by school arranged by class and degree level for undergraduate and graduate students. Detailed data and a summary for all students combined are reported in Part I. Detailed data and summaries for Women, Black, Hispanic, American Indian, Asian/Pacific and Foreign National students are reported together with additional summary data for these special populations combined.

It should be noted that the following features are common to all tables:

(a) The figures for the individual undergraduate years are for FULL-TIME students only. All part-time degree enrollments are combined regardless of the student's academic year standing.

(b) Full-time advanced degree enrollments are reported under the headings of Master's, Engineer or Doctor's degrees and as a total for all full-time graduate students. All part-time graduate student enrollments are combined in one column.

Accreditation and Control Identification (AC). Schools have been assigned a two-digit code to indicate accreditation and public or private control.

The first digit (1-6) indicates accreditation as follows:

1 = At least one engineering curriculum accredited by ABET (1979 list). Used only in the engineering tables.
2 = At least one technology curriculum accredited by ABET (1979 list). Used only in the technology tables.
4 = Accredited by regional accrediting commission (1978-79 list).
5 = Accredited by NATTS (1978-79 list).
6 = None of the above.

The second digit (1-5) indicates control as follows:

1 = Public - state or local government control
2 = Public - federal government control
3 = Private - non-profit, non-sectarian
4 = Private - religious
5 = Private - proprietary

In the section, "Engineering Enrollments by Program (curricula)," the column ACCR denotes ABET-accreditation.

ENGINEERING CURRICULUM

Curriculum data as reported by each school have been consolidated into the 30 curriculum groups as shown here.

- AEROSPACE
- AGRICULTURAL
- ARCHITECTURAL
- AUTOMOTIVE
- BIOENGINEERING
- CERAMIC
- CHEMICAL
- CIVIL
- COMPUTER
- CONSTRUCTION
- DRAFTING & DESIGN
- ELECTRICAL
- ELECTROMECHANICAL
- ELECTRONIC
- ENGINEERING SCIENCE
- ENVIRONMENTAL
- GENERAL
- GEOLOGICAL
- INDUSTRIAL
- MANUFACTURING
- MARINE
- MATERIALS
- MECHANICAL
- METALLURGICAL
- MINERAL
- MINING
- NUCLEAR
- OTHER
- PETROLEUM
- SYSTEMS

The curriculum title used by individual schools may differ from the group heading. The title as reported is shown in the detailed reports for each curriculum group.

HISTORICAL SUMMARY
ENGINEERING ENROLLMENTS IN FALL, 1980
As Compared With Earlier Years

	Fall 1970	Fall 1971	Fall 1972	Fall 1973	Fall 1974	Fall 1975	Fall 1976	Fall 1977	Fall 1978	Fall 1979	Fall 1980
Engineering Students											
Freshman Year, Full-Time	71,661	58,566	52,100	51,925	63,444	75,343	82,250	88,780	95,805	103,724	110,149

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

April, 1981

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

The American Association of Engineering Societies (AAES) is a national organization with 38 member organizations representing nearly one million engineers.

As a central coordinating organization, AAES focuses the resources of the engineering societies on technological issues of national and international importance.

OFFICERS

H. Arthur Nedom
Chairman

Irvan F. Mendenhall
Chairman-Elect

Nicholas J. Radell
Secretary/Treasurer

Kenneth A. Roe
Past-Chairman

Robert A. Frosch
President

Carl Frey
Executive Director

ENGINEERING AFFAIRS COUNCIL

The Engineering Affairs Council is responsible for matters concerned with the practice of engineering in the public interest. The Council encourages voluntary exchanges of information, coordination of goals and joint action.

OFFICERS

Bruno O. Weinschel
Chairman

James F. Shivler, Jr.
Vice-Chairman

Eric Herz
Secretary/Treasurer

THE ENGINEERING MANPOWER COMMISSION
of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

The Engineering Manpower Commission was organized in 1950 to serve as a focus for national technological manpower problems.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

"To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs, and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Engineering Affairs Council of AAES."

EMC OFFICERS AND STAFF

Richard C. Fremon	Chairman
Kenneth C. Brooker	Vice-Chairman
Luke H. Noggle	Chairman, Surveys Committee
Francis W. Stacey	Chairman, Enrollment Survey
Patrick J. Sheridan	Manager, Manpower Activities
Barbara Ann Howley	Assistant
Judith Mellman	Assistant
Rosanna Bonadonna	Secretary

ACKNOWLEDGEMENTS

The Engineering Manpower Commission is pleased to recognize the invaluable assistance of A. Earl Renner and associates of E. I duPont de Nemours and Co., for processing the data for this survey. We appreciate the cooperation of the hundreds of deans and college officials who provided the data on which this report is based. This survey was conducted under the direction of Dr. Francis W. Stacey, Chairman of the Enrollment Survey and coordinated by Barbara Ann Howley, Manpower Assistant to the Manager, Manpower Activity. Donald E. Irwin is consultant to the Engineering Manpower Commission staff.

INTRODUCTION

Since 1967, the Engineering Manpower Commission has conducted annual studies of engineering and technology enrollments in order to provide timely and accurate educational data. This publication is the thirteenth in that series and reflects enrollments as of fall, 1980.

This report is divided into two parts and presents data for all students enrolled in engineering and technology (which includes engineering technology and industrial technology) programs by curricula and school. Summaries of student enrollment in ABET-accredited programs are shown. Undergraduate students are reported by class and graduate students by degree level. Data is presented for all students combined as well as for Women, Black, Hispanic, American Indian, Asian/Pacific and Foreign National students. It should be noted that Part I deals exclusively with engineering enrollments and Part II with technology enrollments.

Part I contains detailed engineering enrollment data by school for all students, Black, Hispanic, American Indian, Asian/Pacific and Foreign National students as well as detailed data by curriculum for all students combined.

It also contains detailed data by curriculum for Women, Black, Hispanic, American Indian, Asian/Pacific and Foreign National students as well as summary curriculum data, combined for all schools, for each of the above groups of students.

Part II contains detailed technology enrollment data by school for all students, Black, Hispanic, American Indian, and Asian/Pacific students as well as detailed data by curriculum for all students combined.

It also contains detailed data by curriculum for Women, Black, Hispanic, American Indian and Asian/Pacific students as well as summary curriculum data, combined for all schools, for each of the above groups of students.

Although every attempt has been made to eliminate errors in reporting the statistics, some discrepancies may have crept into the tabulations. In several cases, inconsistencies in the data submitted have been corrected, or related curricula grouped under a common title so that this report would be manageable in size. Any questions regarding the course content of specific programs should be directed to the reporting institutions. Users of this report are advised to read the explanatory material before using the data tables provided herein.

THE 1980 TECHNOLOGY ENROLLMENT SURVEY

This year's report includes data from 410 technical institutions on their enrollments as of fall, 1980. While the statistecs reported here represent the majority of students in two and four-year technology programs, they are not the total technology enrollments in the United States. Some schools surveyed did not reply to the survey questionnaire and are not included in the report.

Every effort is made to obtain data from all schools having at least one technology program accredited by the Accreditation Board for Engineering and Technology (ABET). For purposes of recording accreditation status the information was obtained from the ABET 1979 report.

ESTIMATED DATA

Information was not received from the following accredited technology schools at the time of publication. In order to present reasonable comparative data to previous reports, information from previous years has been substituted for these institutions:

City College of CUNY
NY Instit. of Tech. -- Old Westbury
NY Instit. of Tech. -- Metropolitan
Roane State Community College
Roger Williams College

In a few cases, schools estimated their full-time students. These data are denoted by an "E" before the school name. When minority data is estimated this is indicated by an asterisk (*) in the minority total column.

It is still difficult to distinguish some engineering technology programs from those in industrial technology without going into a detailed evaluation of each program. Schools themselves may be unclear as to the distinction. Therefore, curricula were grouped according to basic technical fields, i.e., chemical, electronics, etc.

Technology programs non-engineering related, i.e., business, nursing, etc. and those of less than two-year's duration were excluded from the report. The data was reported as submitted by the schools; estimates were made only to the extent necessary to put the data into the standard format. In some instances, pro-rating totals into the appropriate school years or curricula, or reconciling numerical inconsistencies was required.

DATA TABLES

The following data tables are presented for students enrolled in technology programs:

(1) Enrollments for all curricula combined for each school arranged by class and degree level for Associate, Pre-engineering and Bachelor progams. Detail data for all

students combined, Women, Black, Hispanic, American Indian and Asian/Pacific students are reported.

(2) Enrollments for each curriculum by school arranged by class for Associate, Pre-engineering and Bachelor programs. Detailed data and summaries for Women, Black, Hispanic, American Indian and Asian/Pacific students are reported in Part II together with summary data for these special populations combined.

It should be noted that all part-time students at the Associate or Pre-engineering level are reported together and all part-time Bachelor degree students reported as totals without regard to class year.

Pre-engineering enrollments (i.e., the first two years of a four-year program) are listed as separate curriculum without breakdown as to technical specialty. This is because previous surveys have indicated that most of these programs are general in nature, although many students are undoubtedly oriented toward a particular technical field. Most Associate degree programs are designed to be terminal in nature, but many graduates continue on towards a higher degree. Similarly, many students who complete the first two years of engineering transfer programs never enroll in engineering schools.

Accreditation and Control Identification (AC). Schools have been assigned a two-digit code to indicate accreditation and public or private control. The first digit (1-6) indicates accreditation as follows:

1 = At least one engineering curriculum accredited by ABET (1979 list). Used only in the engineering tables.
2 = At least one technology curriculum accredited by ABET (1979 list). Used only in the technology tables.
4 = Accredited by regional accrediting commission (1978-79 list).
5 = Accredited by NATTS (1978-79 list).
6 = None of the above.

The second digit (1-5) indicates control as follows:

1 = Public -- state or local government control
2 = Public -- federal government control
3 = Private -- non-profit, non-sectarian
4 = Private -- religious
5 = Private -- proprietary

In the section, "Enrollments in Engineering Technology Programs in Fall 1980, by Program" column ACCR denotes ABET accreditation; A-denotes Associate degree, and B-refers to Bachelor's.

TECHNOLOGY CURRICULUM

Data have been consolidated into 27 curriculum groups as shown here:

AEROSPACE
AGRICULTURE
AIR CONDITIONING
ARCHITECTURAL
AUTOMOTIVE
BIOENGINEERING
CHEMICAL
CIVIL
COMPUTER
CONSTRUCTION
DRAFTING & DESIGN
ELECTRICAL
ELECTROMECHANICAL
ELECTRONIC
ENGINEERING SCIENCE
ENVIRONMENTAL
GENERAL
INDUSTRIAL
MANUFACTURING
MARINE
MECHANICAL
METALLURGICAL
MINING
NUCLEAR
OTHER
PETROLEUM
SYSTEMS

Although titles may be the same, the combinations are _not_ the same as for engineering enrollments. The curriculum title used by individual schools may differ from the group heading. The title as reported is shown in the detailed reports for each curriculum group.

The difference between industrial engineering technology and industrial technology has been the subject of much confusion in the past. To avoid this difficulty we have used the term "Industrial Technology" only for programs so titled and not otherwise specified as to the technical area. Most programs that would logically fall under one of the industrial engineering functions are grouped under the title of "Manugacturing."

HISTORICAL SUMMARY
ENGINEERING TECHNOLOGY PROGRAMS ACCREDITED BY ABET[1]

Number of Schools**	75	84	91	96	112	119	135	133	150	166

[1] Data up to and including 1978 represent all enrollments in schools with at least one technology curricula accredited by the Accreditation Board for Engineering and Technology at the time of the survey. Data for 1979, which first used the new format, identify enrollments in technology programs accredited by ABET.

* Includes students in both Associate and Bachelors' degree programs for these years.

** Schools with at least one curricula accredited by ABET. The Pennsylvania State University Commonwealth Campuses are counted as one institution.

NOTE: All of the above statistics should be considered approximate because of factors explained in the text.
